About Foamix

Foamix is a specialty pharmaceutical company working to solve some of today's most difficult therapeutic challenges in dermatology and beyond.

With expertise in topical medicine innovation as a springboard, the company is working to develop and commercialize solutions that were long thought impossible, including the world's first topical minocycline. Its proprietary Molecule Stabilizing Technology (MST™) is utilized in the company's dermatology products in late stage development: FMX101 for the potential treatment of moderate-to-severe acne and FMX103 for the potential treatment of moderate-to-severe papulopustular rosacea.

Foamix is a different type of specialty pharmaceutical company by design, driven to see the solutions, overcome barriers in all aspects of business, and reimagine what's possible for conditions with high unmet needs.
